Technical Skills

Programming Languages: Java, Scala, C++, Python, TypeScript, JavaScript, SQL
Backend Engineering: Node.js, Next.js, Hono, Express.js, REST APIs
Cloud & Distributed Systems: AWS Lambda, S3, DynamoDB, SQS, SNS, Athena, Event-Driven Architecture, Asynchronous Processing
Databases & Infrastructure: PostgreSQL, MongoDB, Docker, Prisma, CI/CD, Git
AI / Data Engineering: Amazon Bedrock, LLM Applications, RAG, Natural Language to SQL
Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Distributed Systems, Database Transactions

Work Experience

Software Development Engineer at Amazon | *Java, TypeScript, AWS, Bedrock, Lambda, DynamoDB, S3* Jan 2025 – Present

- Developing scalable backend services and data-processing systems using **Java and TypeScript** to process high-volume seller data and support business workflows.
- Designing **event-driven architectures** using AWS Lambda, SQS, SNS, S3, and DynamoDB for reliable asynchronous processing and scalable service execution.
- Building AI-powered data workflows using **Amazon Bedrock, retrieval-based schema context, and Amazon Athena** to translate natural-language questions into executable data queries.
- Optimizing multi-stage **data and LLM pipelines** for latency, reliability, and response quality across model inference and data retrieval stages.

Projects

Payments App - Advanced | *TypeScript, Node.js, Next.js, PostgreSQL, Docker, Prisma* Apr 2024

- Developed a real-time payment application supporting **peer-to-peer transfers and wallet top-ups** through a custom bank webhook server.
- Implemented transactional database operations using **PostgreSQL and Prisma**, ensuring ACID-compliant payment processing.
- Designed a scalable **monorepo architecture** using Docker and established CI/CD workflows for streamlined application deployment.
- GitHub | Website

Medium: Publishing Platform | *TypeScript, React, Cloudflare, Hono, PostgreSQL, Prisma* Jan 2024

- Developed a full-stack publishing platform using **TypeScript, React, Hono, and Cloudflare serverless infrastructure**.
- Leveraged serverless architecture for **auto-scaling and application performance**, supporting up to 500 concurrent users.
- Implemented PostgreSQL with Prisma and connection pooling for efficient database access in a serverless environment.
- GitHub | Website

Dynamic Profile Management System | *React.js, JavaScript, Node.js, Express, MongoDB* Dec 2023

- Built a profile management system enabling users to dynamically manage more than **200 external profiles**, including LinkedIn, GitHub, and LeetCode.
- Developed REST APIs using Node.js and Express with MongoDB for profile storage, retrieval, and management.
- GitHub | Website

Achievements

The Titan - Top 75 Coders, HackOn with Amazon Season 4 June 2024
LeetCode: 1719 Max Rating | Top 11.57% Globally | 600+ Problems Solved Present
CodeChef: 3-Star | Max Rating 1621 | Global Rank 12 in Starters 160 Dec 2024
Google Kick Start Round H: Global Rank 4617 Dec 2022
GeeksforGeeks: 4-Star | Max Rating 1815 | 250+ Problems Solved Present

Education

National Institute of Technology, Rourkela Rourkela, Odisha
Bachelor of Technology in Electrical Engineering, CGPA: 7.33 *Dec 2021 – May 2025*
Jawahar Navodaya Vidyalaya Dausa, Rajasthan
Intermediate, 93.80% *July 2019 – May 2020*
